EXPECT VALUE

Having trouble finding the perfect furniture to match your aesthetic?

Office Furniture Center can help solve these problems and more with our full-service refurbishing and remanufacturing team. We have professional painters and carpenters in-house that allow us to reupholster or repaint any piece of furniture we have in stock, all at an affordable price. When you have that client that is looking for a unique color or fabric design, OFC can help. See some examples of our work below.

Go Green

Refurbishing office furniture offers a sustainable alternative to purchasing new. Every year, OFC is responsible for diverting over 300 tons of waste from landfills. You can even earn LEED Certification Points just for making a significant percentage of your office furniture purchase pre-owned or refurbished.

ReNewed & Refurbished Warranty

Office Furniture Center (OFC) warrants its remanufactured and refurbished office products to be free from defects in material and workmanship for (5) years from the initial pick-up/ delivery date for as long as the product is owned by the original buyer(s).

Customizable Seating Options

We can make any of our pre-owned seating options including office chairs & lounge furniture, any fabric color you like using premium materials! We can refinish wood or aluminum side chairs, and add new arm pads, casters & cylinders to task chairs.

Reimagine Your Workstation

We specialize in Herman Miller AO2 and Ethospace workstations. By adding new fabric to the tiles, painting a pedestal and adding a new surface, OFC can make a recycled workstation system the perfect fit for your office. Choose any color or style you want to fit your office space or brand image.
